

TD FarmWash

The TD FarmWash is designed and built specifically for washing down farming equipment, milking stations and live stock areas, the FarmWash wash down system is simple to use, and offers unmatched reliability.

the FarmWash is able to draw water from an existing water storage container, well, stream, or rainwater harvesting tank.

The FarmWash is perfect for applications where quick, powerful cleaning is required. the system allows for automatic wash down with no setup or configuration needed once installed.

Although designed for the agricultural industry, the FarmWash is also often found on industrial and commercial sites due to its simple and powerful operation.
