

TWIN VARI-RS BOOSTER SET

PRODUCT OVERVIEW

The DPT Twin Vari-RS booster set is a compact and cost-effective cold water booster set ideal for residential and light commercial installations.

The Vari-RS booster set comprises of two horizontal multistage pumps and air-cooled variable speed frequency inverters with intuitive interface. The system includes a range of advanced features such as fault signals and an error code display as standard.

PRODUCT FEATURES (2RS506/8DPT)

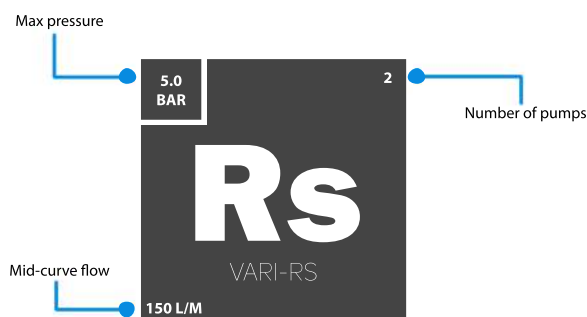

- Flow rate of 150 l/m (mid-curve)
- Head pressure of 5.0 bar
- Dry-run protection as standard
- Ultra quiet running
- Fully KUKReg4 Compliant
- WRAS approved pump
- WRAS approved Vessel and ballvalves
- Glycerine filled pressure gauge
- Digital display for alerts & reporting
- Air-cooled Variable speed inverter
- BMS Volt free contacts

SYSTEM OPERATION

The Twin Vari-RS cold water booster set uses the RS variable speed inverter and is installed onto the Motor Connection Box of each pump in the set. The inverter regulates the rotational speed of the pump using the electrical frequency.

The inverter operates at a minimal value that meets the users demand. In simple terms, once the pressure drops, the inverter recognises the drop in pressure and instructs the pumps to increase speed in order to meet the proportional demand.

CERTIFICATIONS & WARRANTY

TANK OPTIONS

Direct Pumps and Tanks provide a vast array of WRAS approved cold water storage tanks, brass equilibrium ball valves, GRP enclosures for external housing of the booster system.

These enclosures can come fully insulated with encapsulated base boards for added thickness and stability and even drip trays, complete with overflow by-laws and CAT 4 (AG) or 5 (AB) air gap water protection.
