

Technical Data Sheet | LDK1X1

Leak Diverter | 1 x 1m Canopy

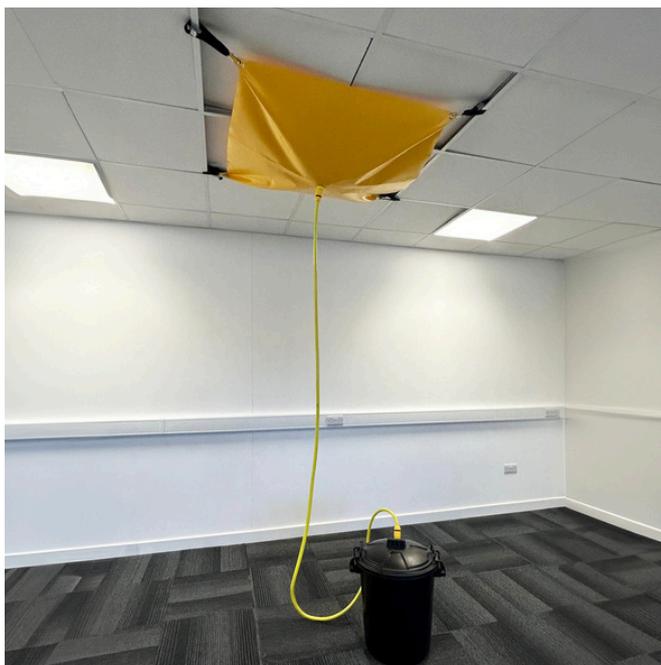

The Leak Diverter provides an effective temporary solution to prevent stock damage and protect your customer's equipment, workplace, employees, and customers from stray leaks. It captures leaks from the canopy and funnels them into a bin, offering a practical way to manage leaks quickly.

This simple, efficient method helps prevent inconvenient roof leaks, reducing the risk of slips and falls by keeping areas dry. Its pinched corners direct liquid toward the centre for better drainage, while the adjustable straps allow for easy levelling and positioning.

Includes: 50Ltr Bin, 4 x Straps (25mm x 2.5m), 5m PVC Hose and 4 x Steel Carbine Clips.

Product Specifications

| | |
|--------------------------------|----------------------------------|
| Dimensions | 1 x 1m |
| Bin Height | Approx. 54cm |
| Bin DIA | Approx. 42cm |
| Bin Colour | Black |
| Canopy Thickness | 580GSM |
| Canopy Coating | PVC |
| Temperature Stability | -30°C (-22°F)/+70°C (158°F) |
| Straps Fabric | High tenacity polyester |
| Hose Connector | 1/2" (12.7mm) |
| Tap Connectors | 1/2" (12.7mm) and 3/4" (19.05mm) |
| Heavy Duty Reinforced PVC Hose | 12.7mm/1/2" fittings |

Product Features and Benefits

Designed to catch and funnel stray leaks from roofs or canopies.

Directs water efficiently toward the centre for optimised drainage.

Easily adjustable for quick levelling and positioning in various settings.

Made from tough, leak-resistant materials for extended use.

Lightweight and easy to install, remove, and store when not in use.

Saves time with its easy installation, allowing you to respond to leaks immediately.

Ideal for various environments, including warehouses, offices, and retail spaces.

Available in 6 different sizes.

Black Bin is weather resistant with 2 lockable and easy to carry handles.
