

Water Management Solutions

AquaHarvest Commercial Rainwater Harvesting Range

Our new Klargester AquaHarvest products provide a fully integrated solution suitable for commercial buildings and vehicle washing facilities amongst other domestic and commercial settings. Made from durable materials, you can future-proof your project against water shortages with this sophisticated rainwater harvesting system.

Why choose an AquaHarvest solution?

- 1 year warranty (terms apply)*
- Fully compliant against EN 16941-1:2018
- Features intelligent Grundfos pump for total reliability
- 3 stage filtration (leaf, pump and in line filters)
- Smart design featuring a calmed inlet at the bottom of the tank
- Service support with commissioning (subject to additional cost)

As part of our Planet Passionate programme, Kingspan are dedicated to delivering innovative surface water management technologies, developed on the back of 70 years' experience.

Klargester AquaHarvest Commercial Rainwater Harvesting Range

How it works

Rainwater directed to the system is firstly filtered by an integral leaf filter, before further filtering on the pump inlet. Final fine filtration is catered for by the inline filter supplied as part of the kit. The Grundfos 'intelligent' pump has the necessary sensors to allow automatic operation when demand is called for by a drop of pressure in the system. If the storage tank has a low level of rainwater, there is a small automatic charge of mains water into the tank to ensure the system never runs dry. The main advantage of this system is that rainwater is delivered to the appliances at mains pressure or higher.

Typical Applications:

- Self Build
- Commercial Buildings
- Vehicle Washing Facilities
- Plant /Tool Hire Washing Facilities
- Garden Centres
- Golf Courses
(Green and Equipment Maintenance)

AquaHarvest Commerical Rainwater Harvesting Range	
Product	Capacity (ltrs)
Below Ground	6,000-79,000
