

Above Ground Potable & Non Potable Storage Tanks

Our comprehensive water storage range delivers versatile solutions for both potable (drinking-water safe) and non-potable applications over a wide capacity spectrum - from compact units to large bulk storage systems. All products are engineered using UV-stabilised medium density polyethylene for durability, weather resistance, and corrosion-free longevity.

For **potable water storage**, tanks are ideal for applications such as emergency or seasonal drinking water supply, animal consumption, food preparation, or hospitality use.

Our **non-potable tanks**, while not approved for drinking water, offer robust, economical water storage options for irrigation, rainwater harvesting, vehicle washing, toilet flushing, or general site water supply. These are suited to agricultural, domestic, commercial, and civil engineering use cases.

Above Ground Potable & Non Potable Storage Tanks

Applications

Bulk water storage
for commercial
and industrial sites

Domestic
water storage and
rainwater harvesting

Temporary
water supply for
events, festivals,
and construction

Civil engineering
or remote site
projects without
mains access

Emergency
potable water
provision

Key features

Suitable for
potable and
non-potable use

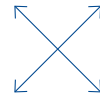

Lockable lid for
added security

Four lifting lugs for
easy handling and
transportation (tank
must be empty)*

100% rustproof,
UV-stabilised
polyethylene
construction

One-piece, seamless,
rotationally moulded
design for superior
strength
