

## PVCPC1000 Waterproof Insulated Cover

PVCPC1000

The PVCPC1000 Waterproof Insulated Cover is a cost effective way of reducing the cool down rate of a product inside an IBC, as well as keeping it dry.

The cover comes with both a top flap, for decanting product into the IBC, as well as a lower flap for decanting the IBC itself, without having to remove the cover.

Made from C-L Polyethylene, with a rating of up to  $-35^{\circ}\text{C}$  and  $+75^{\circ}\text{C}$ , with a 9TOG rating. Heat loss is approx.  $\frac{1}{4}^{\circ}\text{C}$  per hour if filled at ambient, after 12 hours this increases to  $\frac{1}{2}^{\circ}\text{C}$  per hour. The outer layer is 580gram PVC coated polyester, making it lightweight and easy to handle.
